I love my satellite radio. I appreciate the many stations that i can receive,without commercials, just like cable or satellite tv. I have heard advertisements on my local radio against satellite radio and I found them hard to understand. I guess it must be a faer of competition from them which is real albeit overblown. Cable tv has not caused the death of broadcast tv and foreign manufacturers have not eliminated american manufacturers.In these days of steady advances in technology and the global marketplace competition can be fierce. That is no reason to legislate against free choices. Defeat petition 04-160.
